-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_\_ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Drawings***

Figures 8 and 9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the terminals side" in line 6 and "the terminal arranging direction" in line 7, " the state" in line 14, and " the direction" in line 10. There is insufficient antecedent basis for these limitations in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11-74043 (Seto). Seto discloses a connector provided with a connector body to which one end of an object 10 to be connected can be inserted at a predetermined position, a plurality of terminals 5 in contact with the object to be connected inserted into the connector body and a pressing member 4, in which a lock portion 12 is projected on both ends in a terminal arranging direction of the connector body, and when the object 10 to be connected is inserted into the connector body, a notch portion 13 provided on both side ends of the object to be connected is fitted with the lock portion and locked in the direction opposite to insertion, said lock portion is formed by a non-elastic member and insertion of the pressing member into the connector body is allowed in a state where the notch portion of the object to be connected which has been inserted into said connector body is fitted with the lock portion.

Regarding claim 2, said lock portion is formed integrally with the connector body.

Regarding claim 3, wherein a front end of said lock portion is formed so that it is upwardly inclined toward the rear of the connector body.

Regarding claim 4, wherein said lock portion is formed higher than the height of each of the terminals protruding in the direction in contact with the object to be connected.

Regarding claim 5, wherein a front end of said lock portion is formed so that it is upwardly inclined toward the rear of the connector body.

Art Unit: 2833

Regarding claim 6, wherein said lock portion is formed higher than the height of each of the terminals protruding in the direction in contact with the object to be connected.

Regarding claim 7, wherein said lock portion is formed higher than the height of each of the terminals protruding in a direction in contact with the object to be connected.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shimmyo et al. 6,089,905.
